Electrical Installations Remodeling Project

Description:

INGENIBO PROJECTS has carried out detailed engineering projects for remodelling all the electrical installations of Winterthur's buildings in L'illa Diagonal and Francesc Macià Square, to adapt them to the new electrical supply requirements. The supply has been centralized in the first building, with a new Transformer Substation. In the second it has been decentralized.

Technical Characteristics:

L'illa Diagonal Building:

- Area: 12.000 m²
- Electrical power: 2.500 kVA

Francesc Macià Building:

- Area: 18.000 m²
- Electrical power: 1.000 kVA

Date of execution: 2002 – 2003
